# The future of work is AI: leverage Copilot Chat now!

## Driving AI transformation at scale

### Start you customers' AI journey with Copilot Chat

Businesses of all sizes are looking to expand their AI initiatives and unlock the full potential of enterprise-wide value through broad adoption.

Copilot Chat offers a simple and intuitive entry point, enabling employees to seamlessly integrate AI into their daily tasks. Microsoft 365 Copilot takes this further by embedding AI directly into the productivity tools people use every day with Microsoft 365 like Teams, Outlook, PowerPoint. Meanwhile, agents extend this intelligence across systems and workflows, allowing organizations to design tailored, secure, and scalable transformations aligned with their strategic goals.

### Free, secure AI chat for work

Microsoft Copilot Chat is a free secure enterprise-ready AI chat assistant from Microsoft. It is available to all users with a Microsoft 365 subscription and requires no additional license.

Powered by the latest technology like GPT-5, it understands natural language and can answer questions, summarize content, generate ideas, and assist with tasks across your workday.

### Key capabilities:

- Compare documents or data so you can spot what's changed and adjust your response appropriately
- Draft emails and documents that adapt to your writing style
- Gain understanding of long documents more quickly with clear summaries or by asking questions about them
- Brainstorm ideas, generate images, and get instant web answers

### Why use your work account?

- Enterprise security and privacy: protected by your organization's security policies, respect access permissions and keep your data private.
- Access to work contents: taps into your work context (SharePoint, Teams, email, calendar, etc.) for relevant answers
- Productivity and efficiency: integrated into Microsoft 365, helping you get things done faster without switching apps.

## Getting started

1. Log in with your Microsoft 365 work account (Entra ID).
2. Open Copilot Chat via [Microsoft365.com/chat](https://Microsoft365.com/chat) or in the Microsoft 365 Copilot app or directly inside the application (i.e. Teams)
3. Start chatting by asking your first question in the text box.

## Accelerate your customers' AI journey with Arrow support

Our experienced team is here to help you drive your AI transformation.

Start with Copilot Chat, accelerate with Microsoft 365 Copilot, and enable agents to extend this intelligence across workflows.

Then, take advantage of **ArrowSphere Cloud** - our award-winning platform - resources, and trainings to help you:

- Prove full value with BDMs
- Build the AI habit at scale
- Create ongoing opportunity

Watch our webinars to discover the AI opportunity with Copilot Chat, Microsoft 365 Copilot, and agents, then get in touch with your local Arrow representative to learn more!
