Why Arrow's cloud backup for Entra ID?

- Granular or full restore with change comparison
- Automated backups as often as every hour
- Multi-role access through role-based access control (RBAC)
- Full logging of all backup and restore activities for audit readiness
- Immutable, air-gapped storage with segregation of duties
- Flexible retention from a day to unlimited
- True cloud-to-cloud backup, fully isolated from Microsoft 365
- GDPR compliance with full "Right-to-be-forgotten" support
- AES-256 encryption in transit and at rest
- Simplified management through one portal for channel partners and customers
- Insider threat protection with 30 days safeguard

Key features

- Full recovery of identity objects (users, groups, roles, policies) from Entra ID
- Restore of collaboration data across Exchange, OneDrive, SharePoint, and Teams
- Coordinated recovery of both identity and content with minimal downtime
- True end-to-end resilience across the Microsoft cloud environment
