

Integrated IT Infrastructure

For modern virtualization
& edge computing

Henning Mackens
Regional Sales Manager DACH

Scale Computing™

Edge Computing and Networking for a Connected World

Building
the future

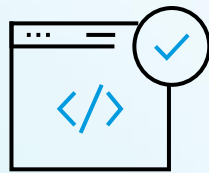

4,000 customers
in 30+ countries

2,000+
partners

100k+ sites

30+ patents

Run applications
where you need

What We Do

IT Challenges We Address

Legacy infrastructure was not built for today's fast-paced, distributed world

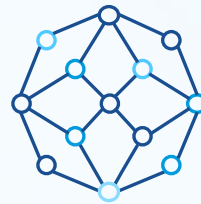

Limited resources

Limited budget, staff and time

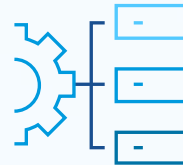

Performance and uptime

Maximize performance, minimize downtime (planned and unplanned)

Complexity

Infrastructure deployment and application management

Flexibility

Hardware, application, and cloud agnostic – easy to scale

Vorstellung: Scale Computing™ Unified Edge

Infrastruktur

SC//HYPERCORE™ VIRTUALIZATION SUITE

- Virtualisierung
- Edge-KI
- Integrierte Datensicherung
- Leistungsoptimierung

SC//RELIANT™ EDGE COMPUTING AS A SERVICE

- Unterstützung hybrider Workloads
- Cloud-agnostische Steuerung
- Integration von Peripheriegeräten
- Automatisierte Orchestrierung

Management, Netzwerk, Sicherheit

SC//FLEET MANAGER™ EDGE ORCHESTRATION SOFTWARE

- Zentralisiertes Management
- Secure Link™
- Zero-Touch-Provisionierung
- Anwendungslebenszyklus-Management

SC//ACUVIGIL™ MANAGED NETWORK SOLUTIONS

- Netzwerk- & Merchant-Gateway-Überwachung
- AcuLink™
- PCI-konformer Fernzugriff
- Sicherer App-Katalog

SC//CONNECT™ SECURE SD-WAN SOLUTIONS

- Zentralisierte Konfiguration
- Cloud-natives SD-WAN und SASE
- Nahtloses Multi-Link-Failover
- Echtzeit-Zustandsüberwachung mit bidirektionalem QoS

Produktvision

Eine Plattform. Vollständige Transparenz. Vollständige Kontrolle.

The Vision

One platform. Complete visibility. Total control.

Consolidates networking, security, and app hosting into a single solution

Virtualizes legacy apps (ie Windows 10) — no rip-and-replace required

Provides real-time visibility and control across all locations

Fully cloud-managed — reduce onsite maintenance

Scales beyond 10,000+ locations

Thank you!

SC//HyperCore™ Virtualization Suite

Integrated Virtualization	AIOps and Data Protection	AIOps and Data Protection
Compute, storage, and virtualization are combined into a single, fully integrated software layer	Self-healing intelligent automation detects, mitigates, and recovers from infrastructure issues in real time. Snapshots and replication reduce the need for manual intervention	On premises component to deliver and manage applications and systems while providing local high availability
		Any x86 Server 

SC//Fleet Manager™ Edge Orchestration Software

Central Multi-Site Visibility	ZTP	Application Lifecycle Mgmt
Single-pane-of-glass cloud-based management of SC//HyperCore™ clusters, with real-time health status, performance metrics, and proactive alerts	Zero-Touch Provisioning (ZTP) automations deployments and streamline daily operations with remote updates, policy-based controls, and secure access	Application Lifecycle Management (ALM) eliminates site-by-site effort, enabling you to push applications or updates across your entire fleet, without scripting, shipping, or stepping foot onsite
		

SC//Reliant™ Edge Computing as a Service

Reliant Platform Manager	Management Plane	Reliant Edge Platform
Web-based and API powered management system providing configuration, orchestration, and management of Reliant Edge Platform	Agnostic dedicated server environment for management, monitoring, central log collection, and analysis	In-store component to deliver and manage applications and systems while providing local high availability
		Any x86 Server 

SC//AcuVigil™ Managed Network Solutions

Network Reliability	Connectivity	Visibility																																																																
We provide hardened network devices that include both SDWAN and NGFW capability with cloud-enabled applications deployable in high availability configurations	We connect, secure, and manage critical customer end-point devices and deploy both connectivity and applications at scale	Complete observability of switches, ports, and endpoint connectivity. Designed with support in mind

SC//Connect™ Secure SD-WAN Solutions

Smart Connectivity	Unbreakable Internet	Non-Stop Performance
Application-aware SD-WAN solutions monitor all your network connections in real time and intelligently steers traffic and to ensure your business-critical applications run smoothly and efficiently	Smart, cloud-managed internet that keeps your business online, even during outages. With seamless failover and intelligent traffic routing, your team stays connected, productive, and protected	Easy deployment without significant hardware investments, allowing rapid scaling and centralized management
