# Autonomous Workspace

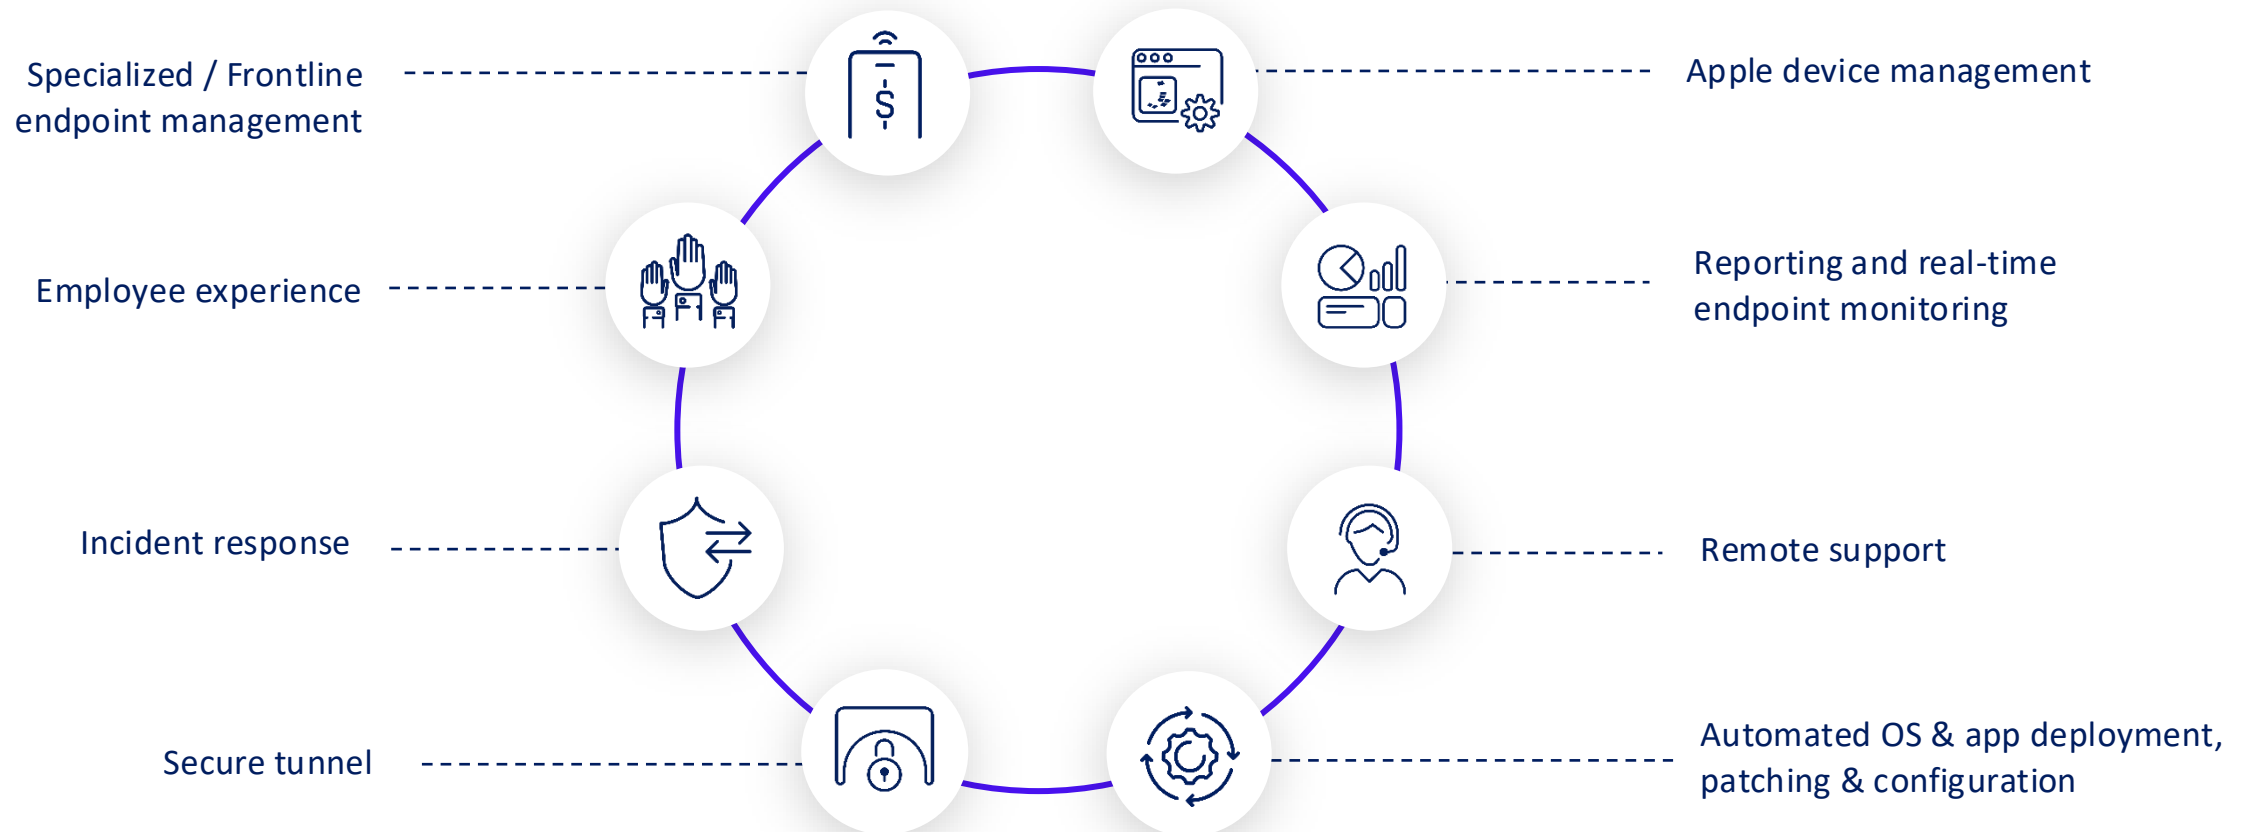

# First AI-driven digital work platform

For smart, seamless, and secure experiences anywhere

# Consolidation without compromise...

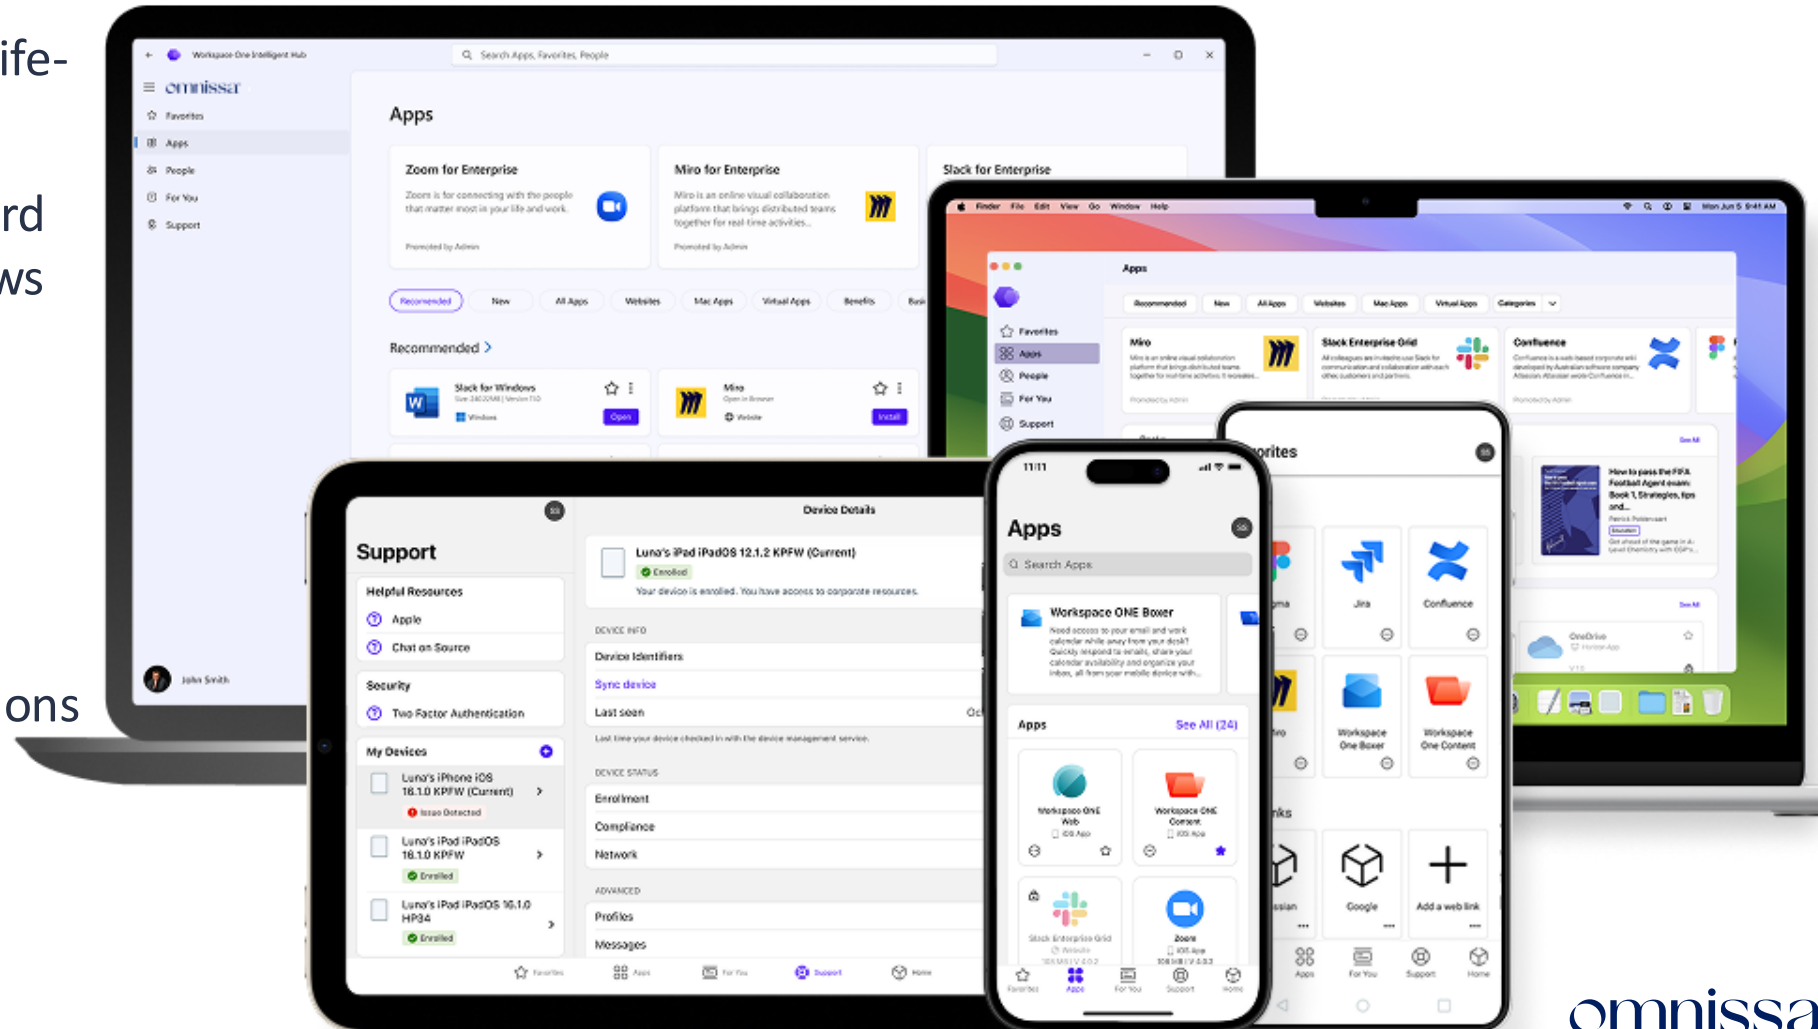

Omnissa is helping eliminate a patchwork of solutions customers bolt on for their EUC needs

# Omnissa Workspace ONE® Intelligent Hub

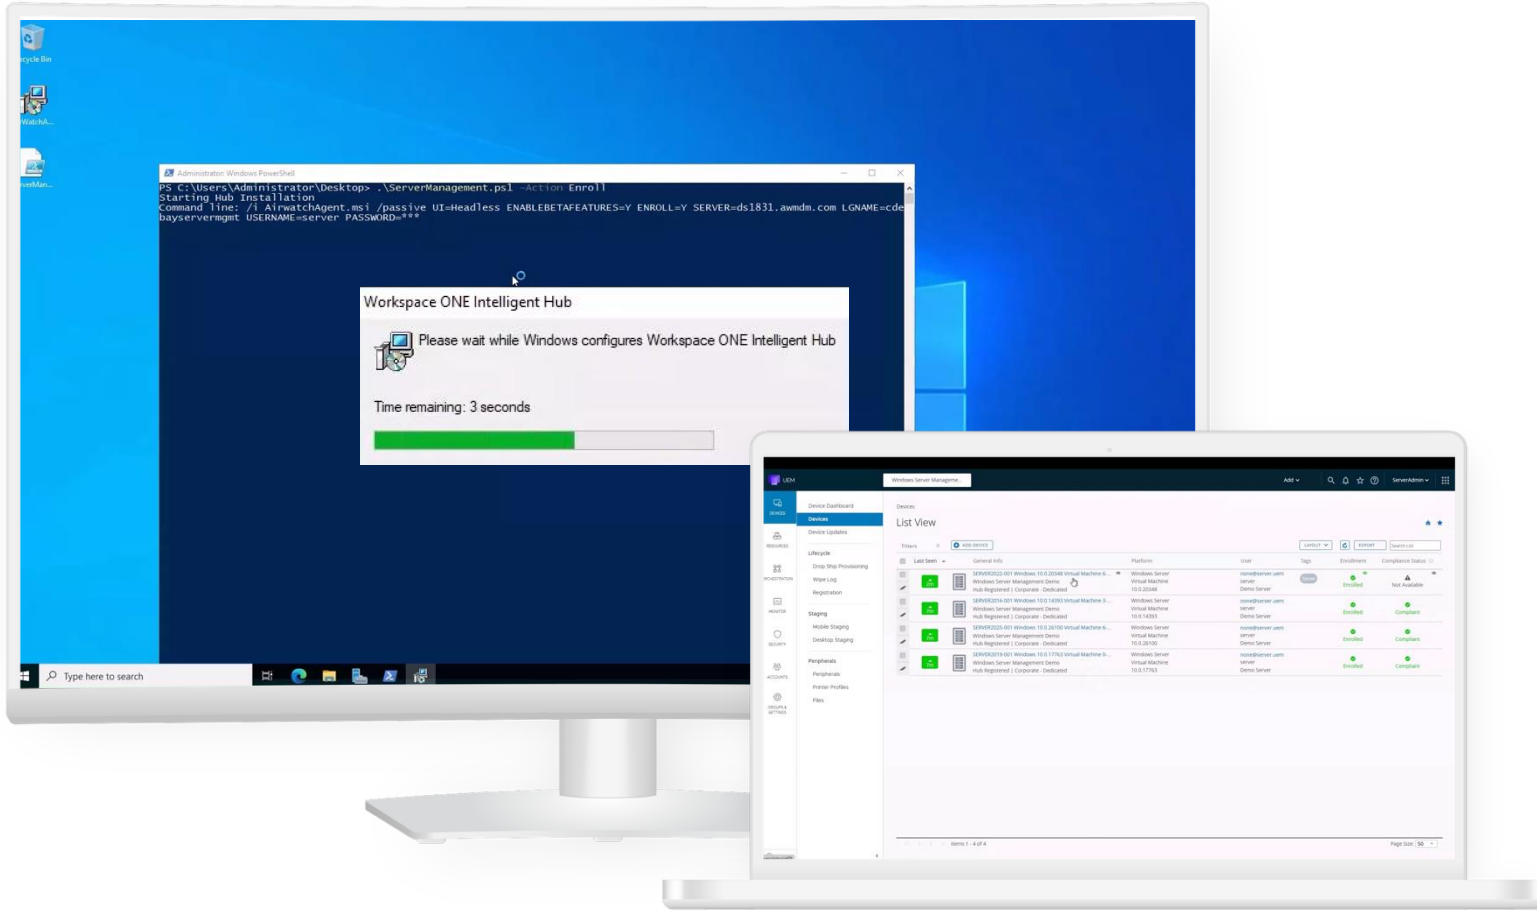

Secure, reliable and consistent access to all apps and resources from any device

- Standalone employee life-cycle experiences
- BYO/unmanaged and 3rd party managed Windows devices
- Single sign-on
- Self service
- Remote support
- IT and HR communications
- People search

# Support for server management

Made possible with Intelligent Hub managed mode

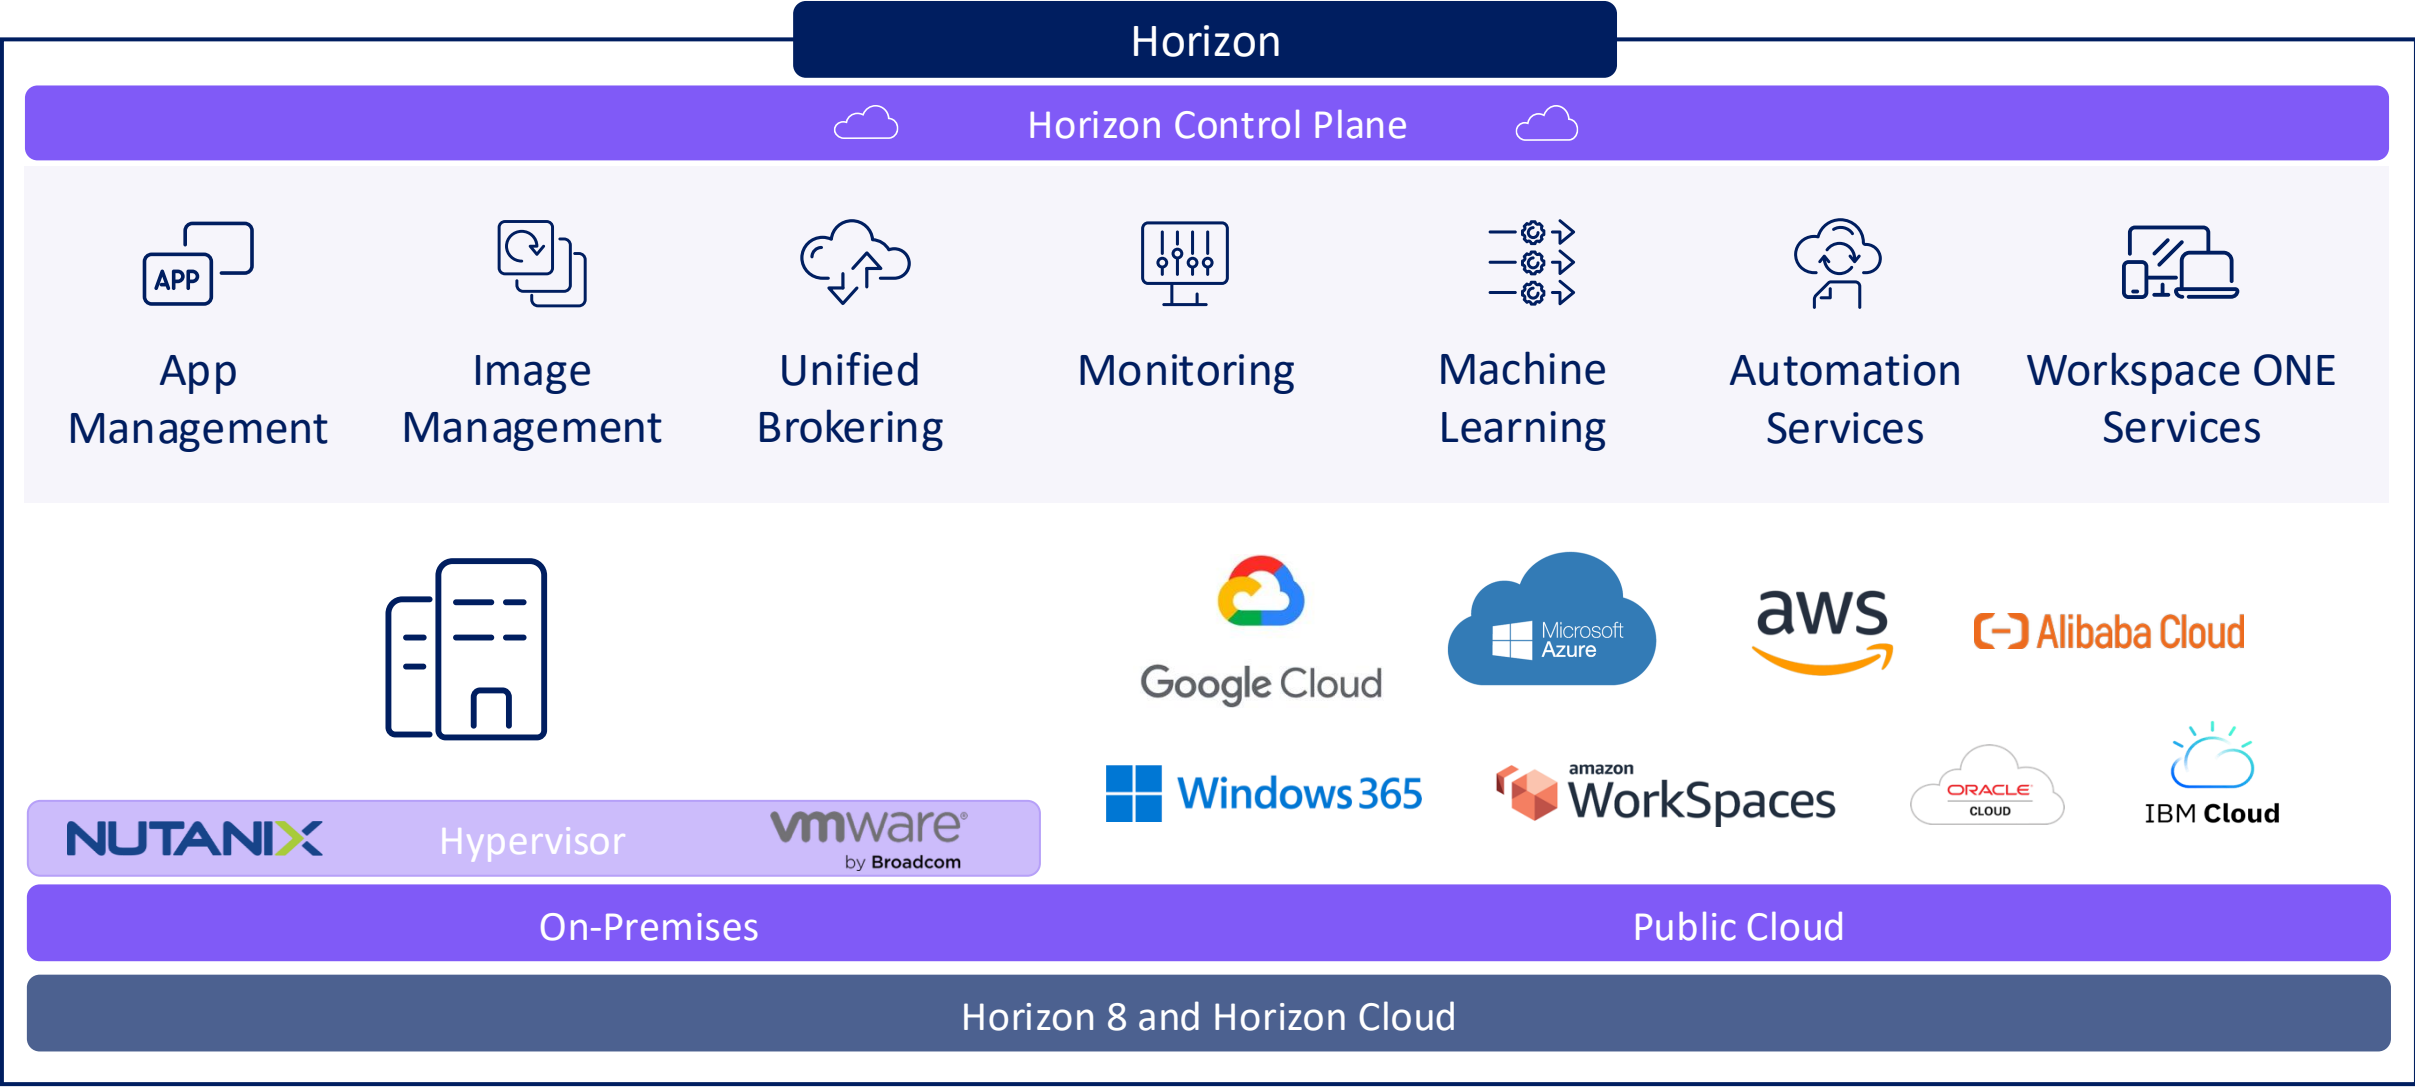

- Flexible enrollment options
- Support for pre-registration
- Windows Server OS versions:

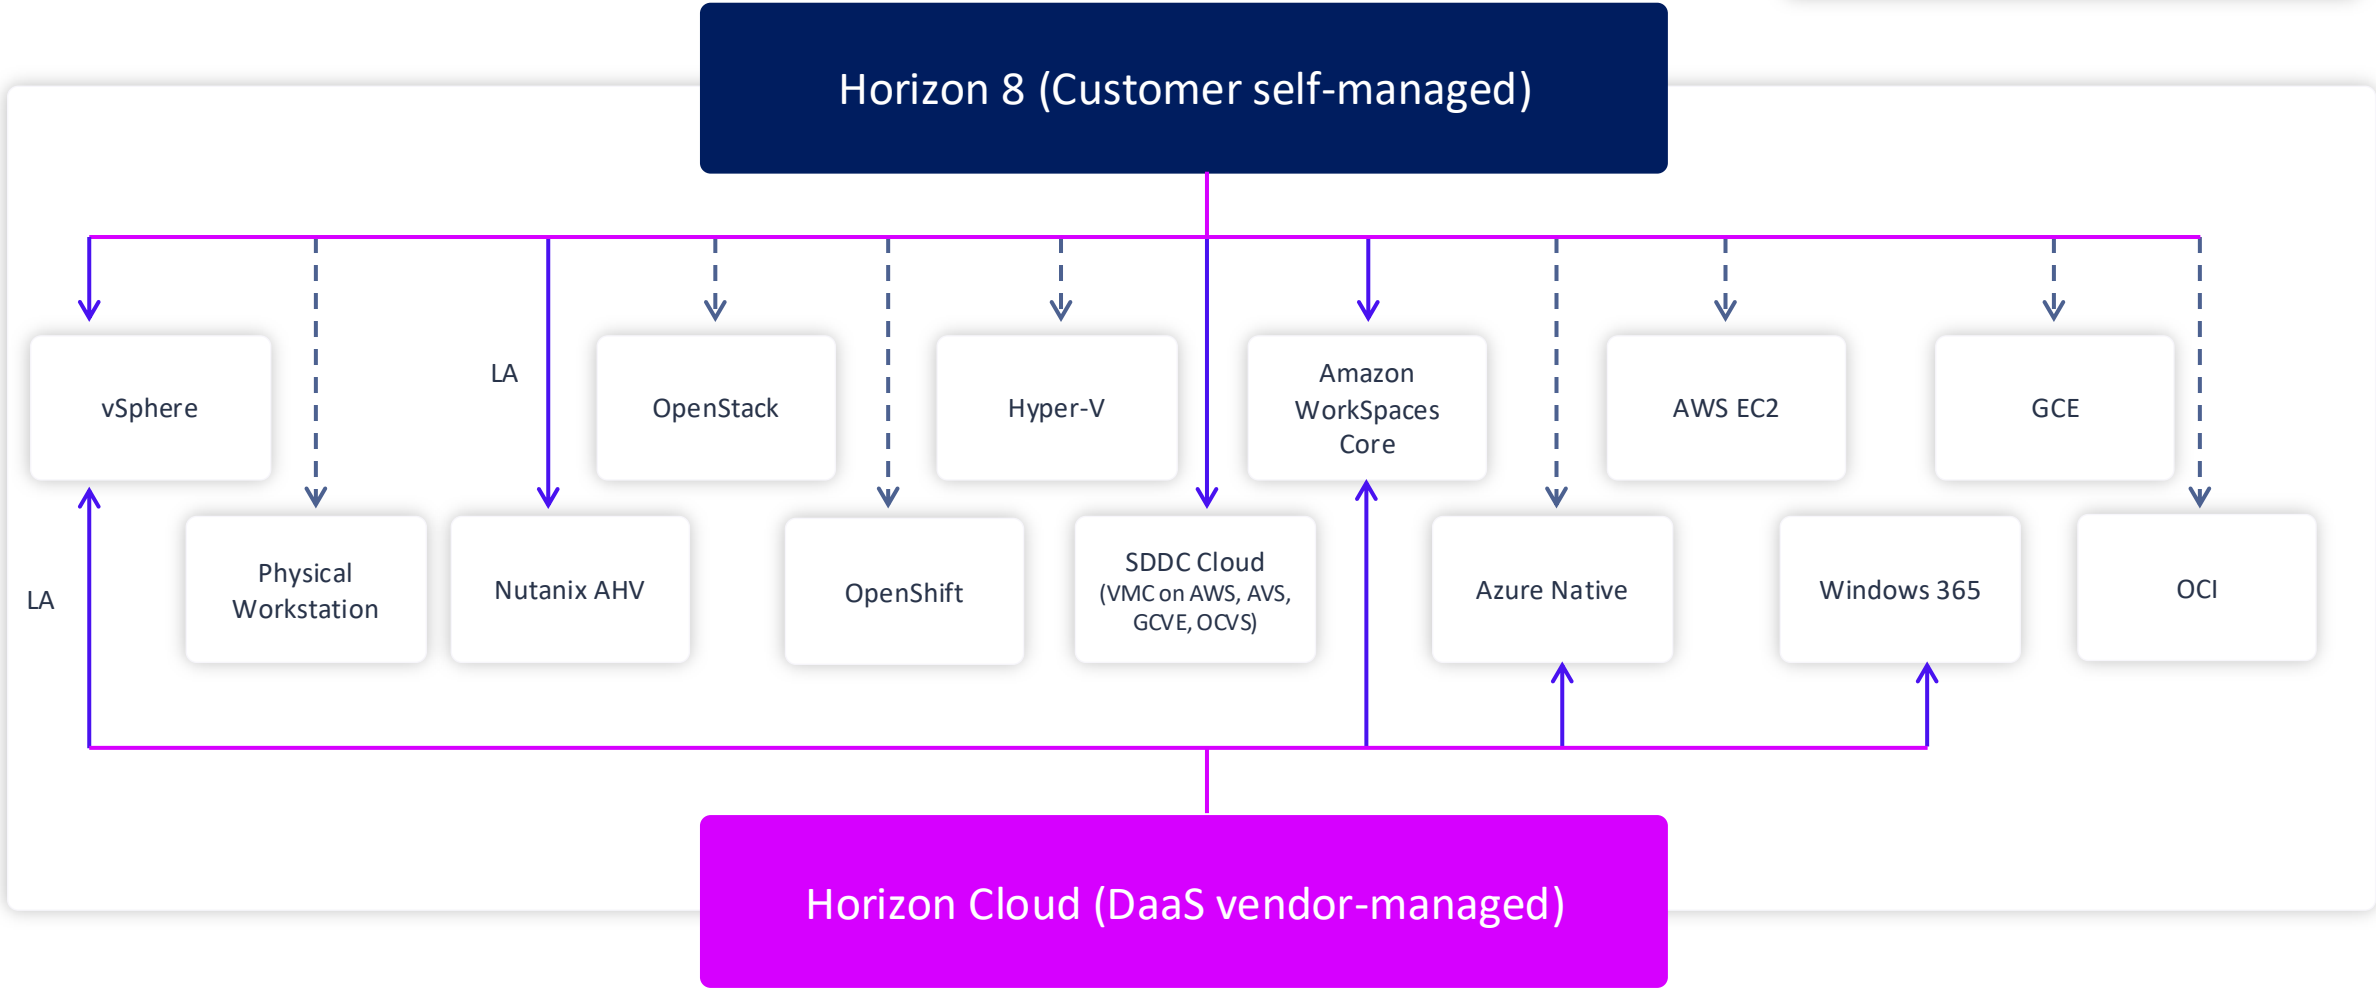

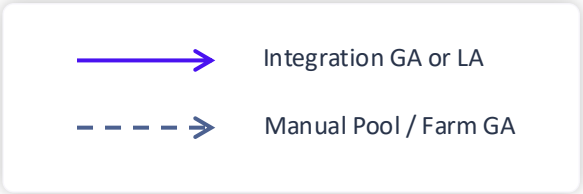

2016 | 2019 | 2022 | 2025

All editions (Standard, Datacenter, Essentials, Datacenter; Azure Edition) including Core and Desktop Experience

# The Horizon Control Plane Unifies Management Across Any Deployment You Choose

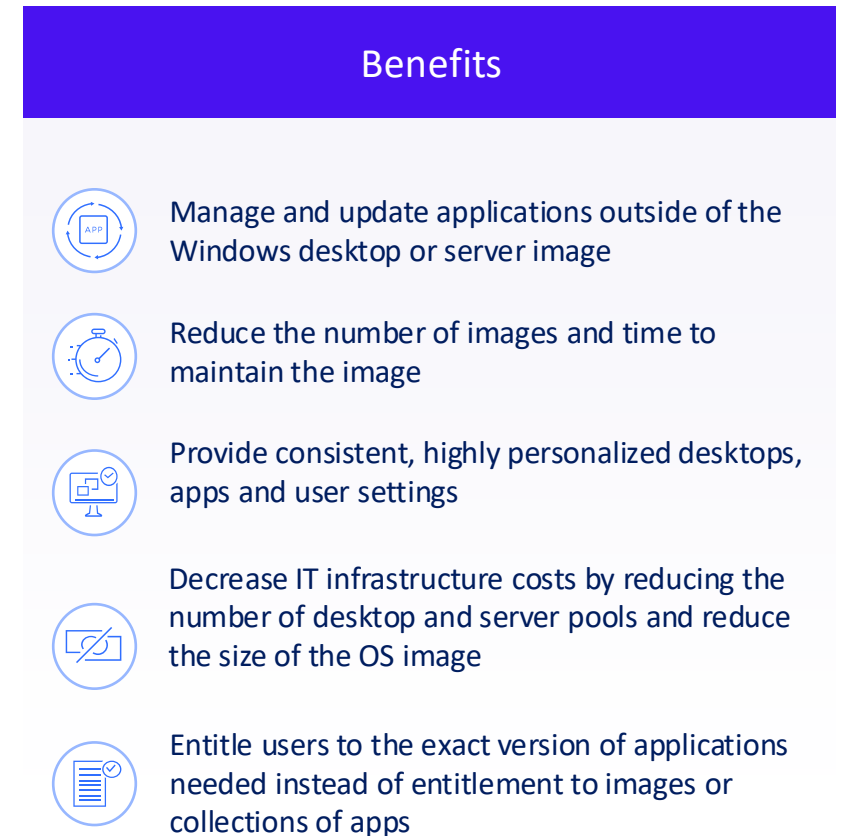

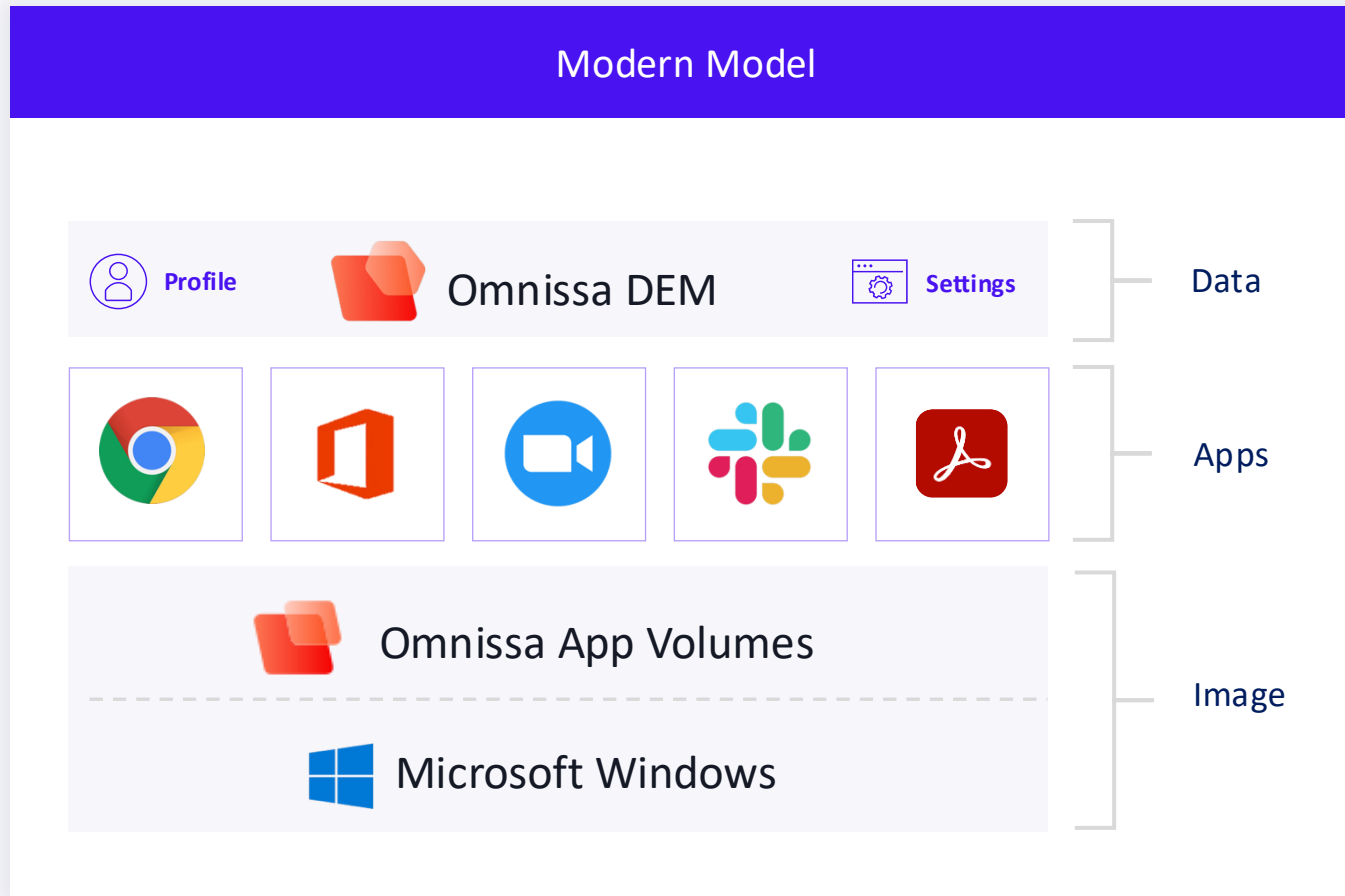

# Horizon platforms and capacity support - today

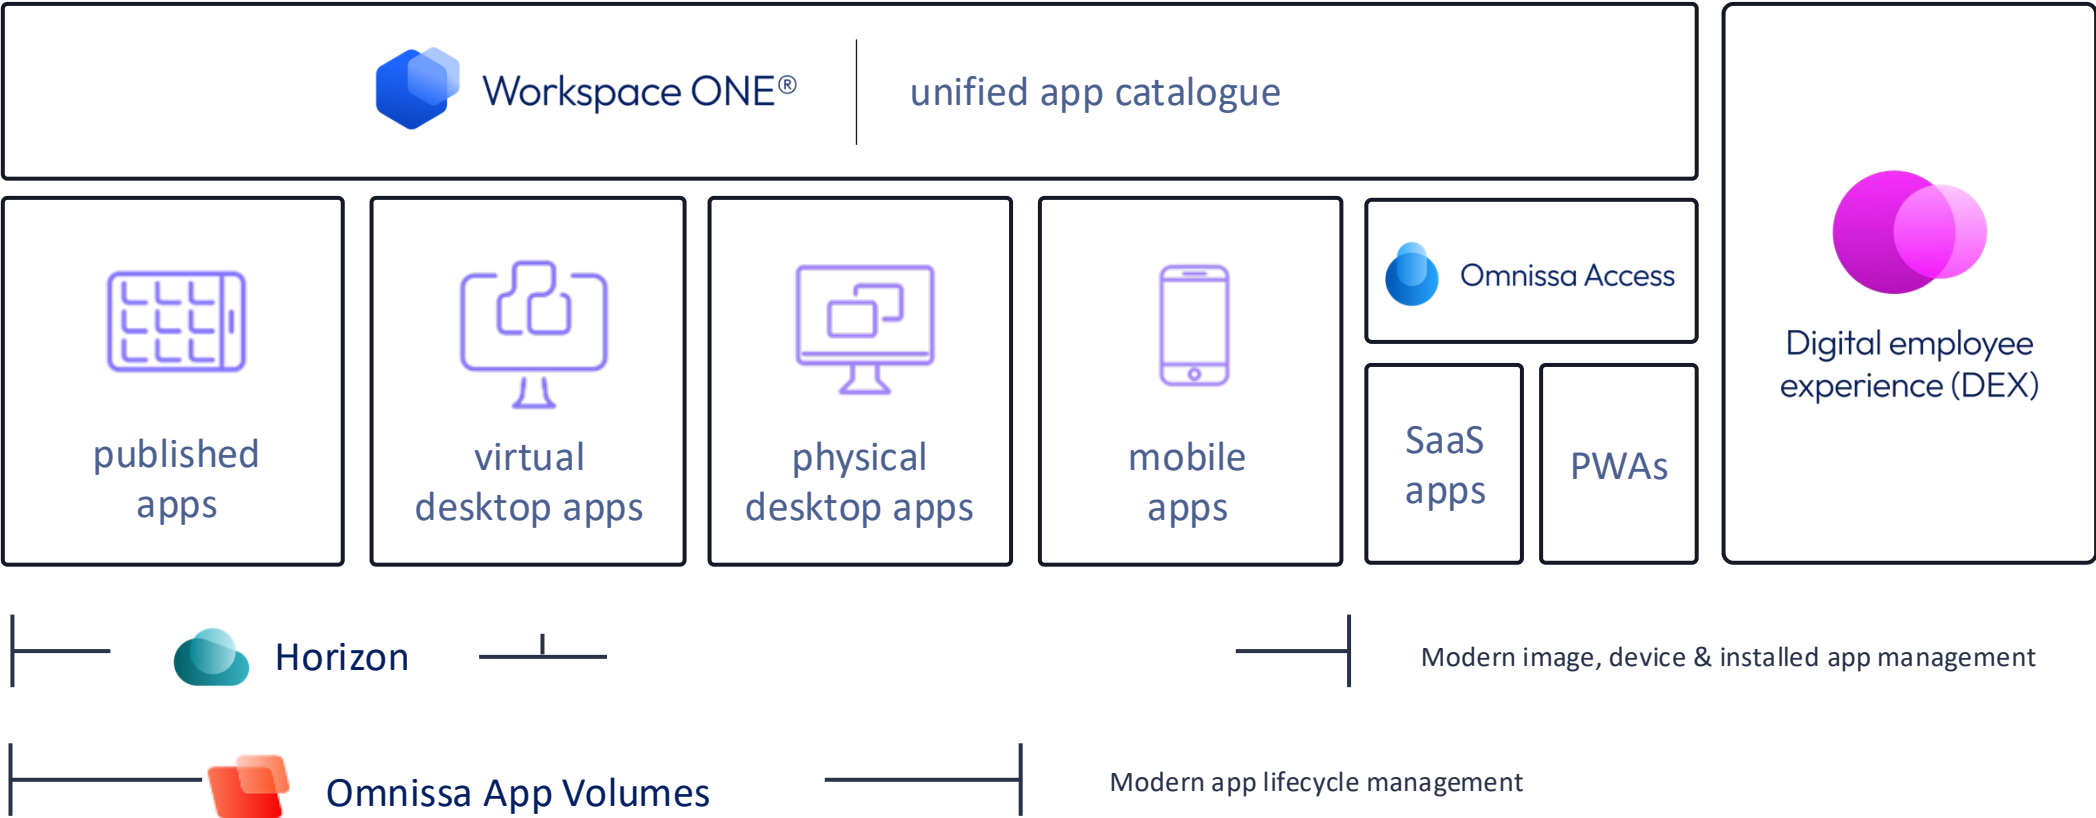

# Modern App Management with Omnissa App Volumes

## Real-time App Delivery with Apps on Demand

# Single Catalog for the User and Apps Follow

# This is the way...

VHD, VHD Wrapped MSI, MSIX App Attach VHD and VMDK

## VHD (or VMDK)

The basis for all App Volumes Packages which using a JSON for metadata.

## MSI Wrapped VHD

An MSI that contains the VHD and JSON metadata which know how to install/uninstall with App Volumes.

## MSIX App Attach VHD

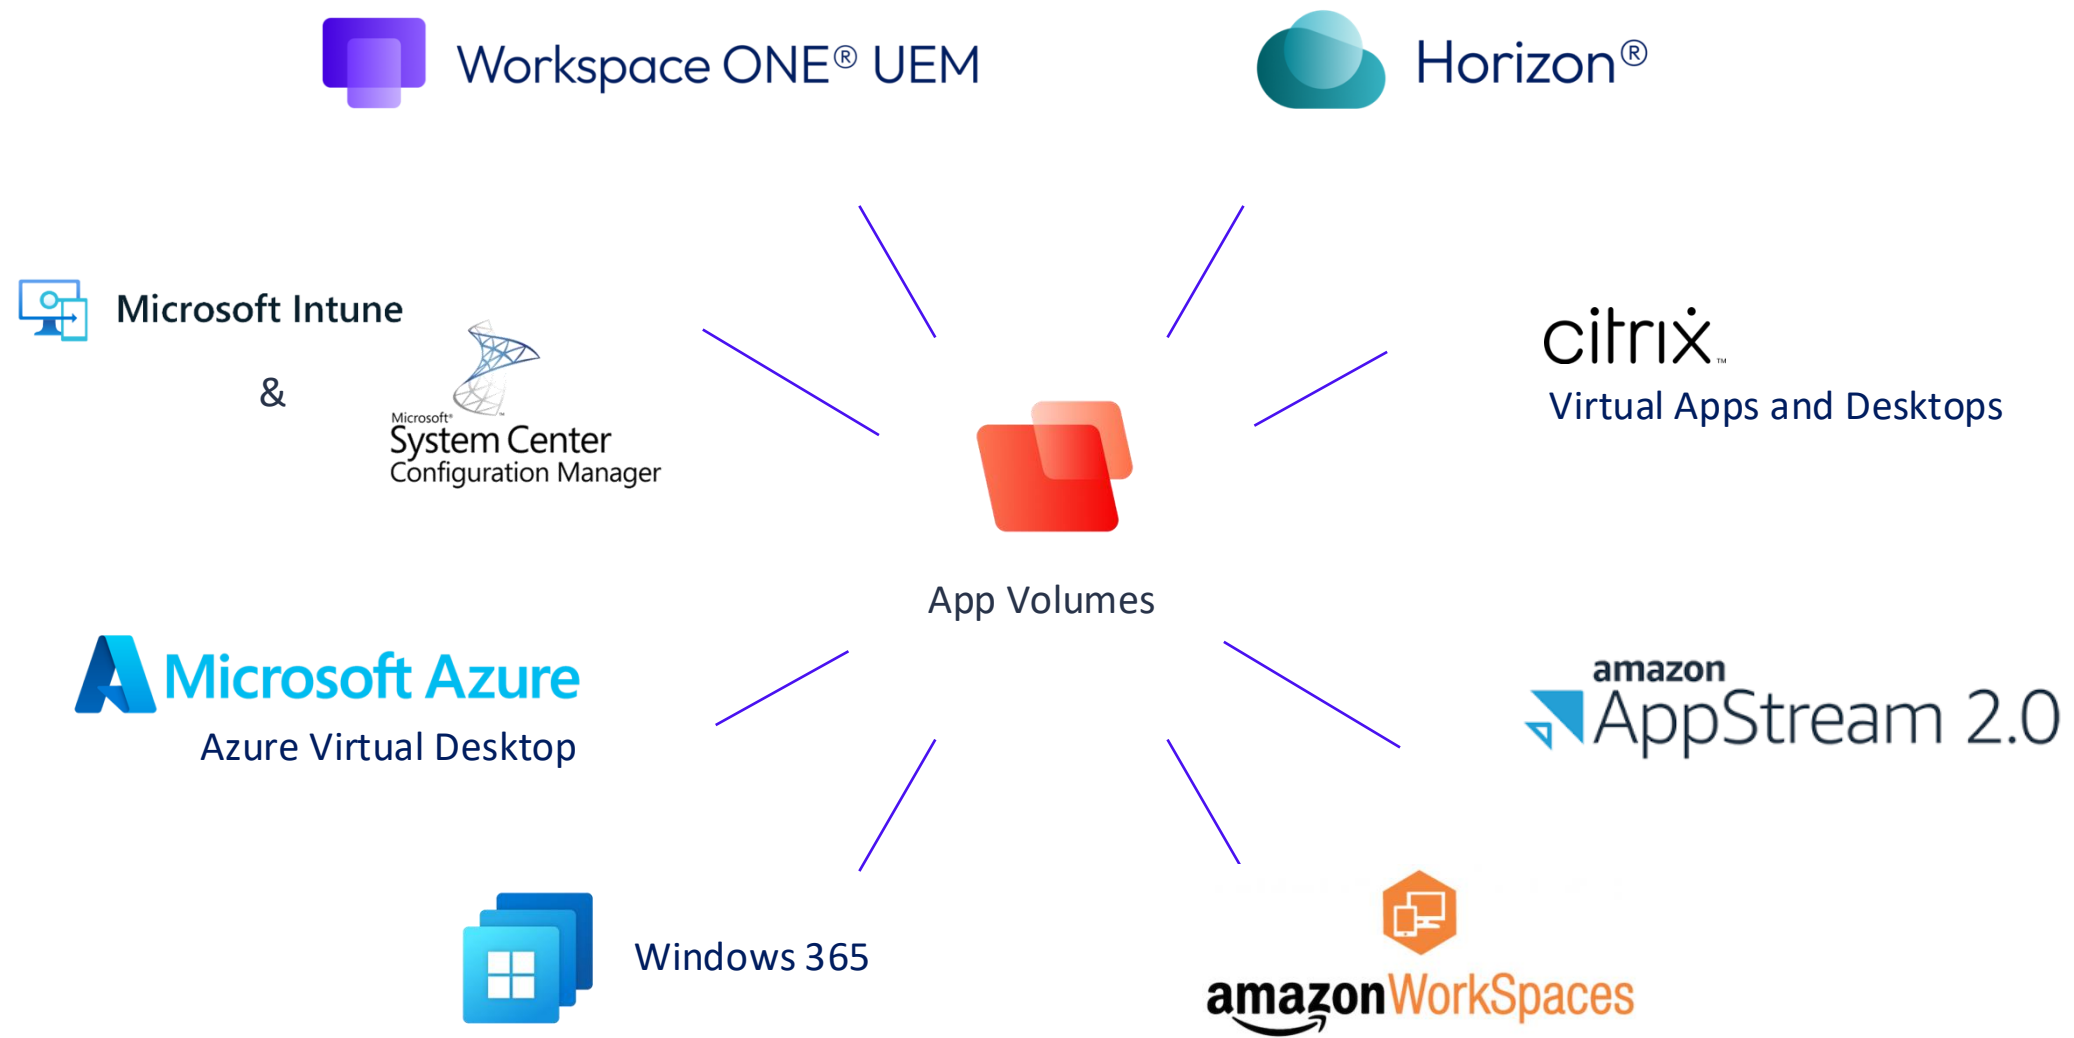

App Attach can also be delivered in a VHD. App Volumes AppCapture can update it with a JSON so App Volumes can deliver it as an expanded MSIX.

## ThinApp

Isolate applications, run multiple versions of the same app at the same time, compatibility of older applications on a newer OS.

# Apps everywhere

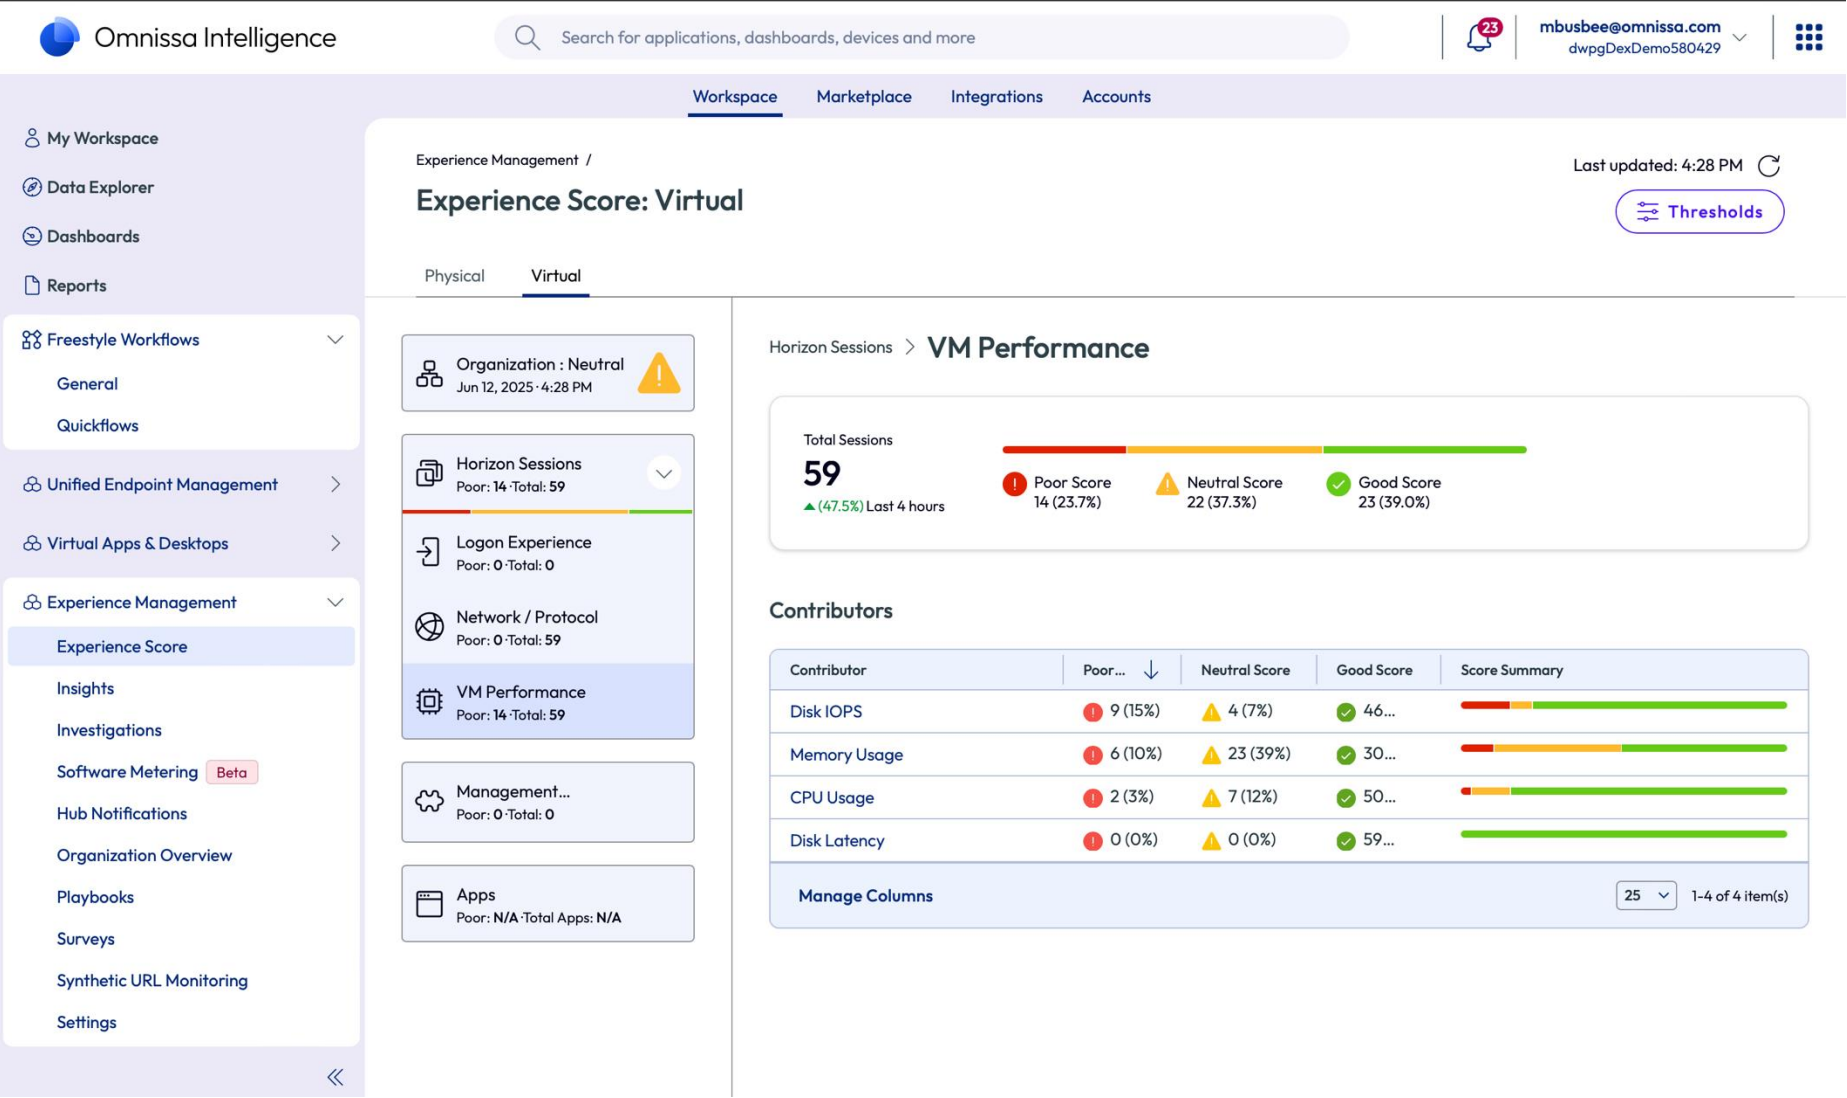

# Dynamic Environment Manager

## Overview

# Experience Management - powered by Omnissa Intelligence

Improve employee engagement by creating a seamless digital workspace

Track workspace KPIs impacting digital employee experience across desktop, virtual and mobile

Get real-time visibility and proactively identify issues

Perform root cause analysis

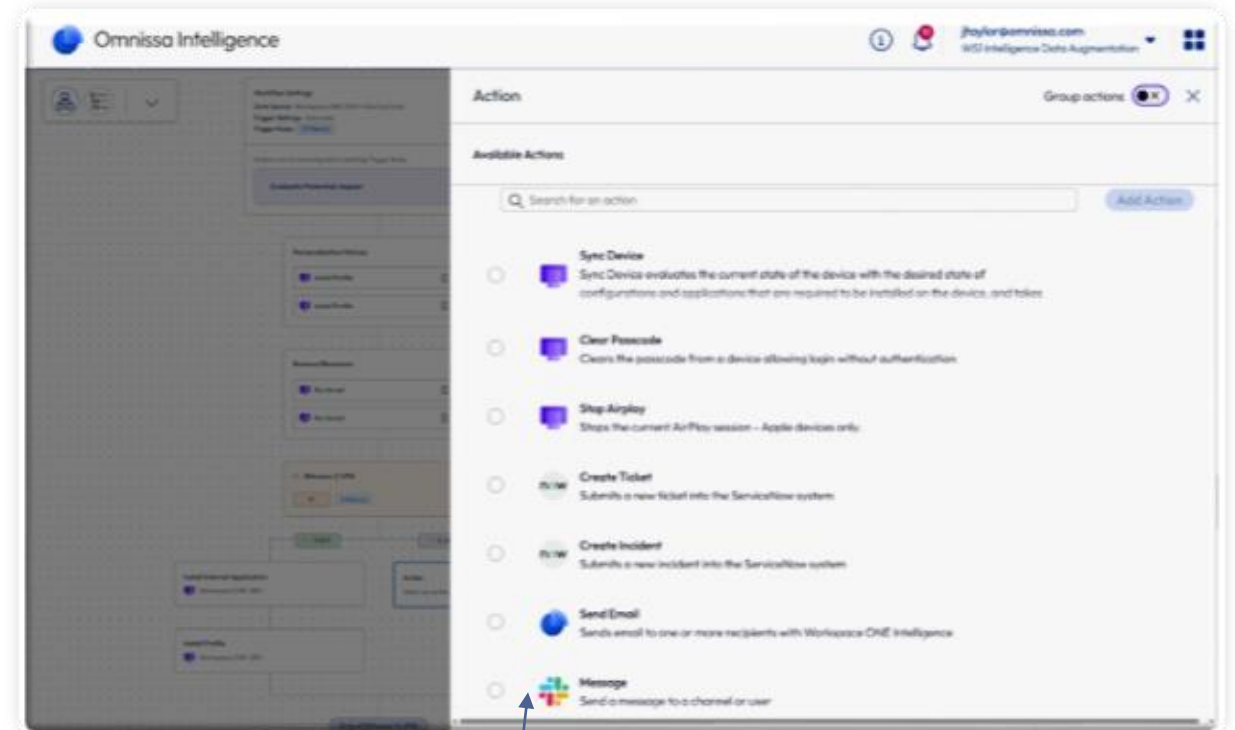

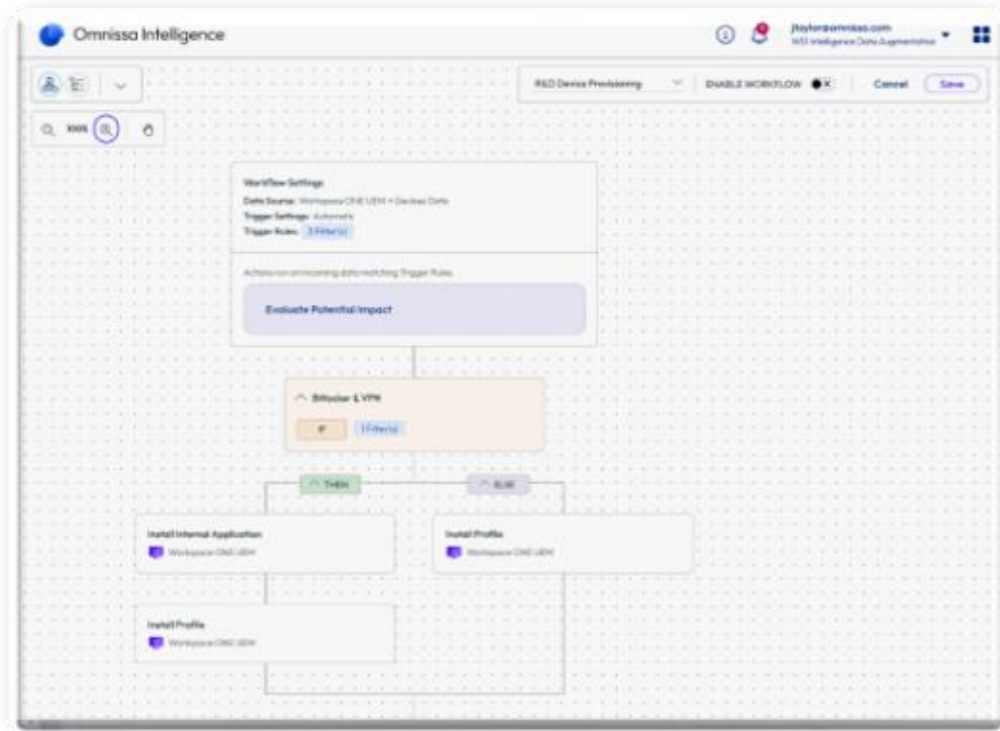

Predict potential issues that may arise in the future

Design and automate a fix and notify users

# Automate complex workflows with freestyle orchestrator

Powerful, flexible, and intuitive low-code canvas to manage all your IT workflows

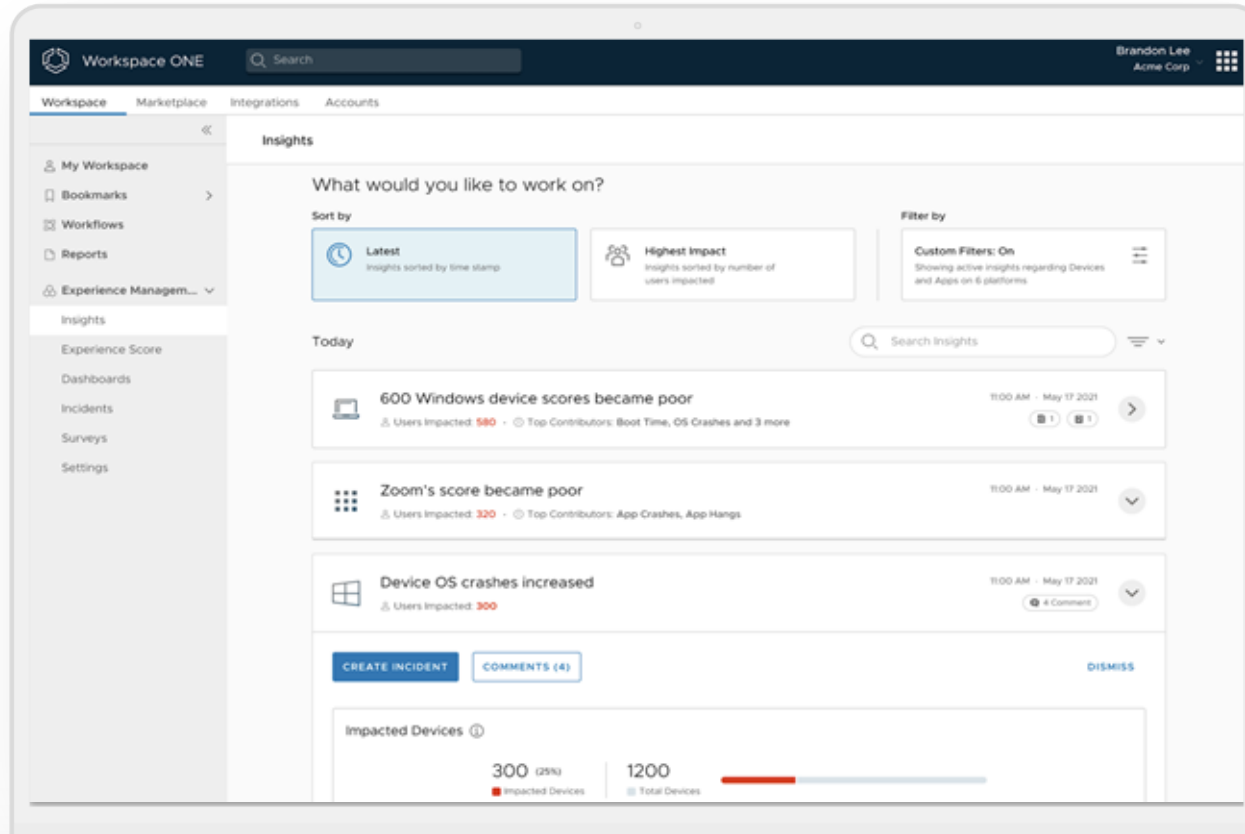

Data-driven operations that leverage workflows based on contextual data

Integrate with 3rd party apps to orchestrate actions across the entire IT ecosystem

# Omnissa AI in action: Insights

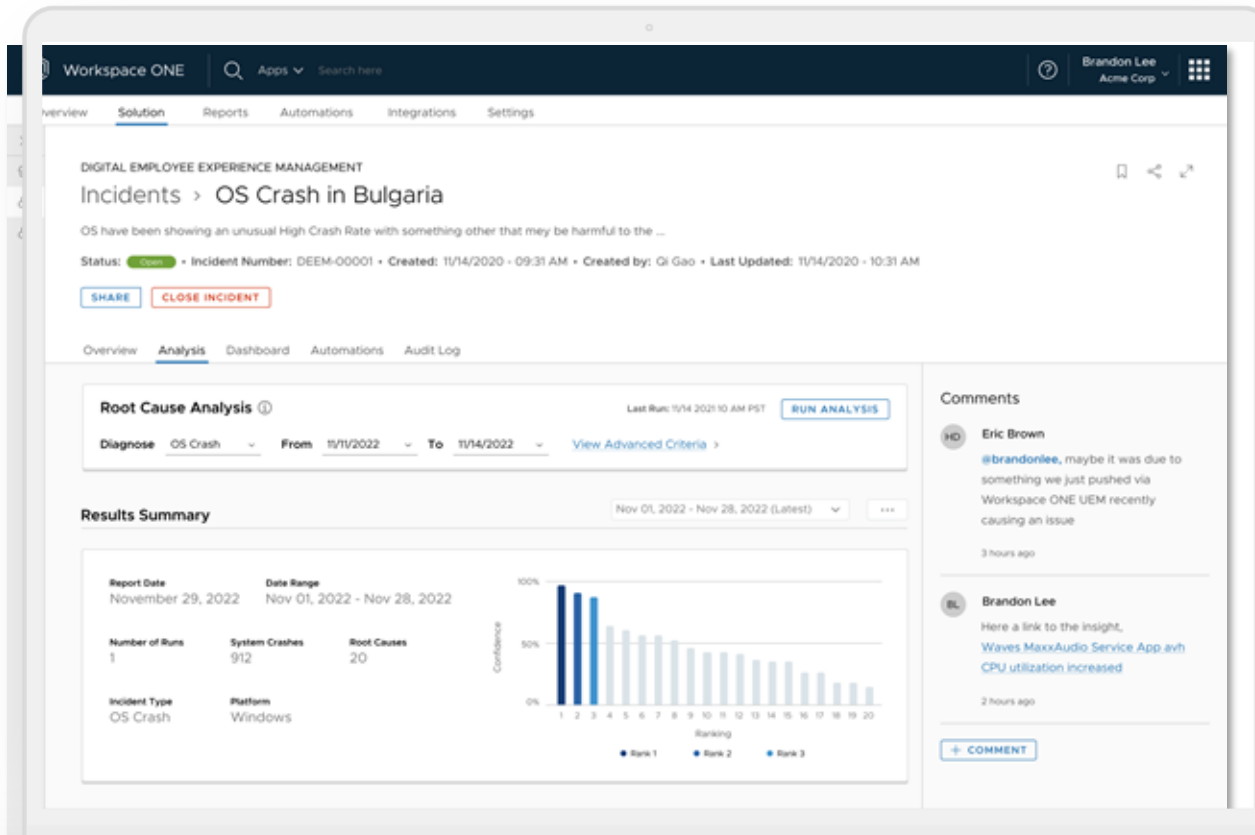

Proactive anomaly detection for superior digital employee experience

- Proactive issue detection  
Automatically flags critical issues in real time, reducing reactive firefighting.
- Comprehensive visibility  
Intelligently identifies anomalies across your entire digital environment without manual configuration or guesswork.
- Self-optimizing intelligence  
Continuously learns and adapts to your unique environment, delivering increasingly precise insights with minimal IT effort.

# Omnissa AI in action: Guided Root Cause Analysis

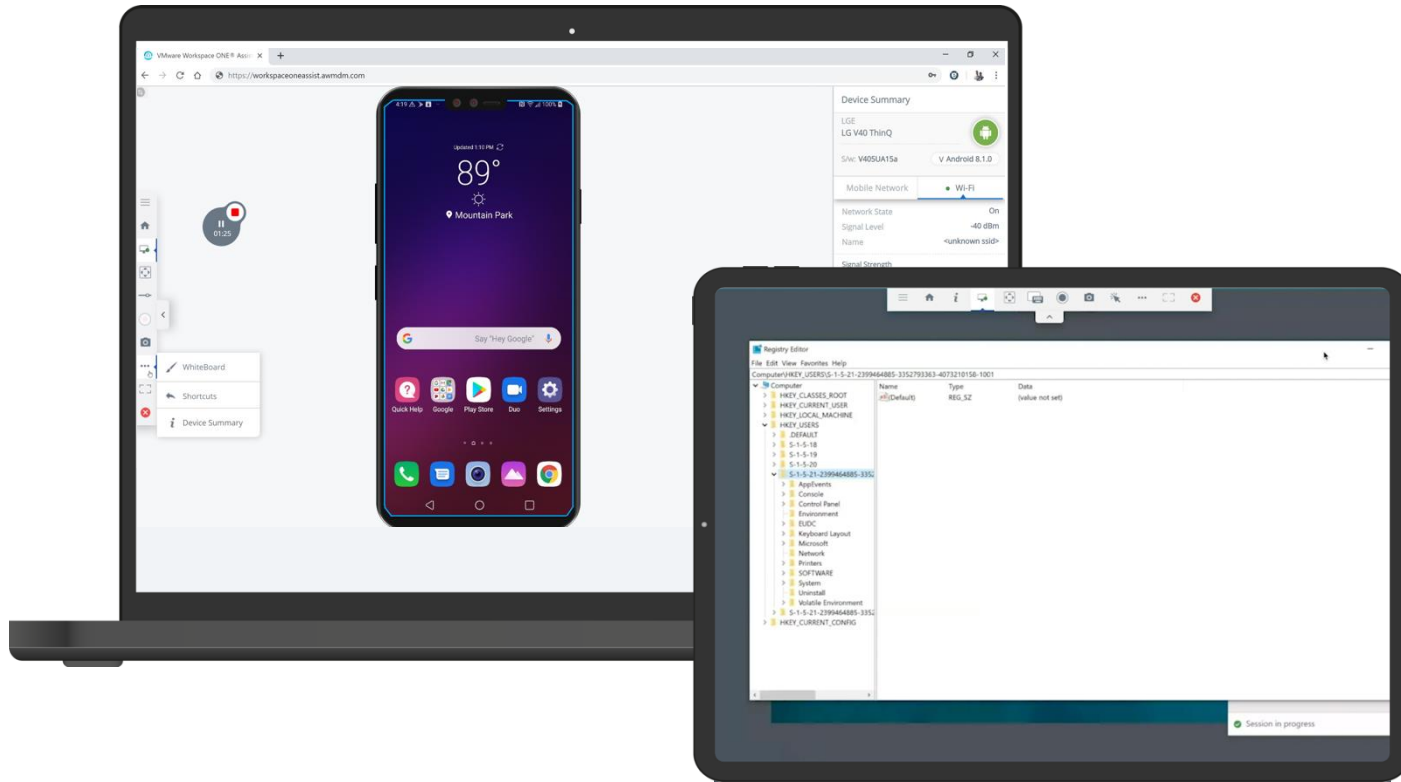

Decrease MTTR through algorithmic analysis

- Cut resolution time  
Instantly create a trackable Investigation with all relevant data, dashboards, and automated analysis in one workspace.
- Eliminate guesswork  
Our AI automatically analyzes hundreds of data points to pinpoint the root cause, eliminating manual investigation.
- Solve common issues  
Diagnose and fix a wide range of common problems like slow boot times and application crashes.

# Remote support for Workspace ONE and Horizon

## Empower employees across the device and app lifecycle

Workspace ONE  
Assist

Workspace ONE  
Assist for Horizon

- View or control devices in real-time to quickly **troubleshoot and fix** device, network, or app issues with file and task management tools
- Highlight items and guide employees through various tasks with **screen draw**
- **Enhanced privacy** for knowledge workers
- **Unattended access** for corporate owned or kiosk devices (Android, Windows desktop, macOS, Windows CE and Linux)
- **Record** remote sessions for training

Remotely support employees with physical device issues, directly from the Workspace ONE console, and those with virtual desktop issues from the Horizon Universal console.
